# Appreciation of Black Contributions:

[Wangari Maathai - Founder of the Green Belt Movement](#)

[George Washington Carver - Agricultural Scientist and Inventor](#)

## 3. **George Washington Carver** (January 1864 – January 5, 1943)

George Washington Carver (image: public domain)

The contributions of George Washington Carver to agriculture, particularly southern U.S. agriculture cannot be overstated. Carver single-handedly improved the lives of thousands of poor southern farmers by providing information on crops, cultivation techniques, and recipes for meals. He is best known for research into and promotion of alternative crops to cotton, particularly focusing on peanuts and sweet potatoes. Carver was a progressive agricultural thinker, encouraging farmers to submit soil samples for analysis to determine causes of poor yield. Beyond crops and soils, Carver also taught livestock care and food preservation techniques. Carver was a great agricultural educator, researcher and humanitarian, and has gained worldwide acclaim for his lifetime of achievements to agriculture.
